JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS
VOLUME 38, 23 DECEMBER 1991

Proceedings of the International Symposium on Computational Mathematics (ISCM '90)
August 30–September 4, 1990, Matsuyama, Japan

CONTENTS

T. Yamamoto
Preface ix

E.L. Allgower, C.-S. Chien, K. Georg and C.-F. Wang
Conjugate gradient methods for continuation problems 1

E.L. Allgower, K. Georg and R. Widmann
Volume integrals for boundary element methods 17

O. Axelsson
The method of diagonal compensation of reduced matrix entries and multilevel iteration 31

C. Brezinski and S. Paszkowski
Optimal linear contractive sequence transformations 45

X. Chen and T. Yamamoto
PCG methods applied to a system of nonlinear equations 61

J. Descloux, Y. Jaccard and M.V. Romerio
A bidimensional stability result for aluminium electrolytic cells 77

H.W. Engl and G. Hodina
Uniform convergence of regularization methods for linear ill-posed problems 87

A. Frommer
Generalized nonlinear diagonal dominance and applications to asynchronous iterative methods 105

S. Fujino, M. Mori and T. Takeuchi
Performance of hyperplane ordering on vector computers 125

C.W. Gear
Waveform methods for space and time parallelism 137

C.W. Groetsch
A simple numerical model for nonlinear warming of a slab 149

T. Hasegawa and T. Torii
Application of a modified FFT to product type integration 157

Y. Ikebe, Y. Kikuchi and I. Fujishiro
Computing zeros and orders of Bessel functions 169

K. Ishihara
Projected successive overrelaxation method for finite-element solutions to the Dirichlet problem for a system of nonlinear elliptic equations 185

Y. Iso and K. Onishi
On the stability of the boundary element collocation method applied to the linear heat equation 201

J.W. Jerome
Numerical approximation of PDE system fixed-point maps via Newton's method 211

D.K. Kahaner, E. Ng, W.E. Schiesser and S. Thompson
Experiments with an ordinary differential equation solver in the parallel solution of method of lines problems on a shared-memory parallel computer 231

Y. Kametaka
On counting functions of self-similar sequences 255

T. Kitagawa
Asymptotic stability of the fundamental solution method 263

X.-Z. Liang and L.-Q. Li
On bivariate osculatory interpolation 271

C. Liu, Z. Liu and S. McCormick
Multilevel adaptive methods for incompressible flow in grooved channels 283

G. Miel
Trends in systolic and cellular computation 297

M.T. Nakao
Solving nonlinear parabolic problems with result verification. Part I: One-space dimensional case 323

M.-T. Noda and T. Sasaki
Approximate GCD and its application to ill-conditioned algebraic equations 335

T. Ooura and M. Mori
The double exponential formula for oscillatory functions over the half infinite interval 353

N. Osada
Acceleration methods for vector sequences 361

B.N. Parlett
Symmetric matrix pencils 373

T. Sakurai, T. Torii and H. Sugiura
A high-order iterative formula for simultaneous determination of zeros of a polynomial 387

H. Sugiura and T. Torii
A method for constructing generalized Runge–Kutta methods 399

M. Tabata and S. Fujima
Finite-element analysis of high Reynolds number flows past a circular cylinder 411

T. Ushijima
Computational aspect of linear water wave problem 425

D. Wang and F. Zhao
On the determination of the safe initial approximation for the Durand–Kerner algorithm 447

Z. You and Z. Xu
Ball algorithms for constructing solutions of nonlinear operator equations 457

List of invited talks 473

List of talks at the Symposium 475
